0.1 Here is an equation example:

$$\varphi(x, z) = z - \gamma_{10}x - \sum_{m+n \geq 2} \gamma_{mn}x^m z^n \tag{1}$$

0.2 Here is an 'Display Math' example:

$$\left(\int_{-\infty}^{\infty} e^{-x^2}\right) = \int_{-\infty}^{\infty} \int_{-\infty}^{\infty} e^{-(x^2+y^2)} dx \, dy$$
